

New Zealand

## anything but run of the mill

You've probably noticed that it takes more than just a good product to build a long-lasting business relationship. Don't take chances with your timber partner. You need 100% commitment from senior management right down to the shipping company. Welcome to McAlpines, the largest privately owned sawmilling, timber and building materials group in New Zealand. Take a moment to see how our operation stacks up:

- Formed in 1954 to take over the original timber business GA McAlpine & Sons, established in 1925
- Employing over 350 staff
- Three sawmills close to three major ports

- Capacity to process 300,000 cubic metres of sawlogs and round wood per year
- Capacity to kiln dry 150,000 cubic metres per year to moisture content specifications
- All three sites are licensees of the **New Zealand DRI** quality assurance programme
- Combined treating capacity of 150,000 cubic metres per annum
- Processing operations including cut-to-length, planing and profiling and finger-jointing
- Exporters of timber products to Australia, South East Asia, Taiwan, Japan, United Kingdom, Europe, United States of America, Pacific Islands and the Middle East

# McALPINES SOUTH PINE

**Clears**

This is the highest quality and most valuable of all the grades produced from pruned sawlogs. It is commonly used for furniture, joinery and internal finishing.

**Number One Cuttings**

This high yield cuttings grade allows for cross cutting of long length clear wood for remanufacture. Each piece will yield 80% of its length in clear cuttings, with at least one section at a minimum of 1.8m in length.

**Number Two Cuttings**

This medium yield cuttings grade allows for cross cutting of medium length clear wood for remanufacture. Each piece will yield 70% of its length in clear cuttings that are 600mm and over in length.

**Number Three Cuttings**

This economy cuttings grade allows for cross cutting of short length clear wood for remanufacture. Each piece shall yield 60% of its length in clear cutting that are 250mm and over in length.

**Industrial**

This is the lowest grade to come out of the radiata pine sawlog. This product is suitable for packaging, pallet manufacture and defect docking.

**C.O.L (Cut of log)**
